

LAKE WATER, WELLS, OR OTHER PRIVATE WATER SYSTEMS

Members shall not connect a private water system such as lake water, wells, or other private water system to a line connected to a public water system such as Twin Creek WSC. This would create a cross-connection.

A cross-connection is a physical connection between a public water system and either another supply of unknown or questionable quality, any source which may contain contaminating or polluting substances, or any source of water treated to a lesser degree in the treatment process.(TCEQ 290.38.18)
